Quiksal®

Saliva Drug Testing Technology

PRECISION TOXICOLOGY SIMPLIFIED

Accurate, quick & easy-to-use saliva testing technology

Quiksal®

What is Quiksal?

The New Standard in Toxicology:
Saliva Drug Testing Mouthwash

Quiksal is an oral toxicology rinse that alleviates the burden of traditional blood or urine collection while providing the broadest test panel and lowest sensitivity levels on the market.

Why Quicksal?

- **Superior Methodology** - oral solution is safer and more efficient than swabbing and / or urine drug test.
- **Proprietary Testing** - patented, nontoxic and nonabrasive.
- **Gender Neutral Administration** - nonintrusive and does not require uncomfortable observed collection.
- **Quick Collection** - less than 2-minute total collection time. Wash stimulates salivary glands.
- **Responsive & Accurate** - results within 48 hours of receipt.
- **Qualified Laboratory** - CLIA Certified laboratory Developed Test (LDT).
- **Extensive Testing Options** - Tests for over 110 analytes and metabolites, including presence of nicotine (cotinine).
- **Compliant** - CA SB700 & WA RCW49.44 compliant.
- **High Sensitivity & Specificity** - Accurate 1ng/ml sensitivity for all analytes and metabolites.
- **Web App Tracking** - Easy-to-use web based app for inputing examinee info, scanning tests, and tracking results.

Quiksal®

Why Quiksal?

Urine Testing is a thing of the past.

It's time to evolve your testing protocol.

Urine Drug Tests (UDT) haven't changed significantly in over a half-century. They are socially invasive, expensive/time consuming to administer, easy to beat, and are succeptable to cross-contamination resulting in false positives.

Quiksal is Ideal for:

- Workplace Testing
- Transportation & Equipment Operation
- Insurers
- Workers Compensation
- Clinics & Clinical Practices
- Hospitals and Pharmacies
- Home Health
- Rehabilitation Clinics
- Elderly Care
- Correctional Institutions
- Schools & Universities
- Individual/Family Testing

Flexible Ordering Process and Reliable Packaging Makes it Easy to Implement

Quantities/Packaging Options

SINGLE USE

For flexible use case scenarios

6/12 PACK

For small/ medium sized businesses

24 PACK

For large organizations

Also available in a **96 pack carton**, perfect for enterprise organizations and TPAs, as well as an **1152 pack pallet**, for insurers, healthcare facilities, enterprise businesses.

Reliability is Key

- 2-year shelf-life
- Stable at room temperature
- Customer friendly digital platform and web application for
- uploading test information and receiving results
- 24-hour, 365 customer support

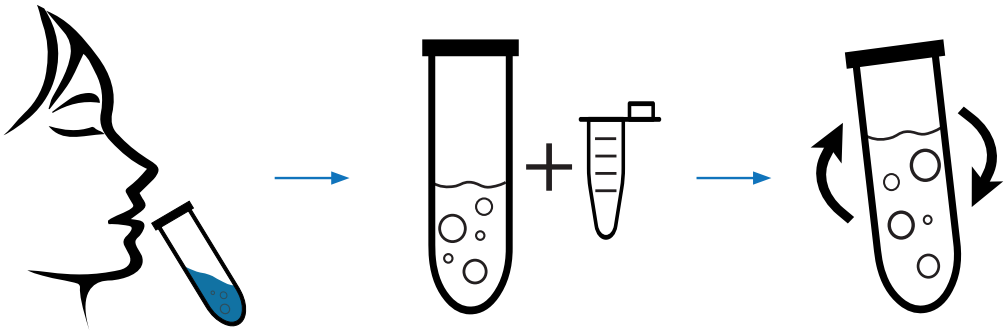
Quiksal®

How Does it Work?

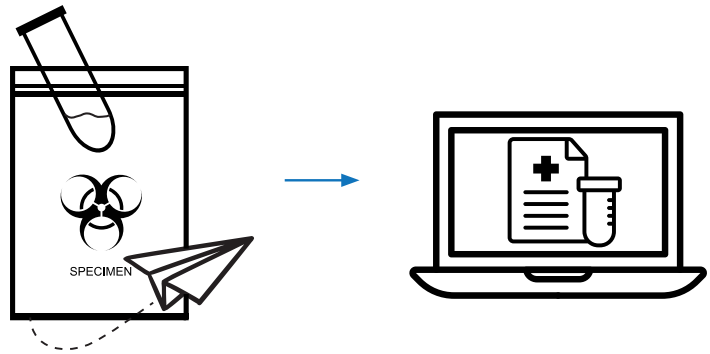
The New Standard in Toxicology:
Saliva Drug Testing Mouthwash

Quiksal is an oral toxicology rinse that alleviates the burden of traditional blood or urine collection while providing the broadest test panel and lowest sensitivity levels on the market.

5 Simple Steps
to get Accurate 2-day Results



SWISH **SPIT** **STABILIZE**



SEAL/SEND **48-HR RESULTS**

Quiksal®

FAQs

Answers to common questions

What tests can Quiksal cover?
Anything blood can cover. No limits, can add new substances within 2 to 3 weeks

Which industries would benefit from Quiksal?
Any entity that's doing anything in toxicology. Anyone wanting to reduce risk, in both safety as well as legal liability .

How do you get the results?
Results can be attained by either scanning the box and following the included directions ,or go to myquiksal.com and enter their information into their unique portal.

What are the key benefits of Quiksal?

- On-site testing with minimal training
- Results in 48 hours with a CLIA certified lab report equivalent to blood
- Eliminates same sex collectors and MRO's
- Eliminates all logistical issues of off site collections and the need for multiple tests being administered.
- Prevents wrongful terminations which causes significant costs associated with recruitment and training.

How do I order Quiksal testing kits?
Test kits are available on our website at https://quiksalusa.com or by contacting us directly to configure an order to meet your requirements.

Quiksal®

How does Quiksal compare?

Drug Screening Cost Analysis

Test Method	Direct cost (Kit plus analysis)	Indirect Cost			Total Cost
		Offsite admin*	Lost Productivity**	Admin Facility Fee, Test Kit and Analysis	
Quiksal	**$175 to $285**	**$0**	**$0**	**$0**	**$175 to $285**
Quantisal	$7	Off site - ~$210	$300+	$130+	**$647+**
Urinalysis	$5	Off site - ~$210	$300+	$100	**$515+**
Rapid Urinalysis (Environvac example)	$15	Off site - ~$210	$300+***	$130+	**$655+**

*Off site assumptions - 3 hours x 2 employees x $35/hr
** Lost Productivity assumption - 3 hours x 2 employees x $50
***If non-negative, send off site to clinic for urinalysis
